ETHICS IN RESUSCITATION
KEY MESSAGES

GUIDELINES 2025
EUROPEAN RESUSCITATION COUNCIL©

Support patients in understanding and sharing their values and preferences as part of advance care planning with integrated do-not-attempt-CPR decisions

Termination of resuscitation should be made using a holistic approach considering the combined picture of the situation, all prognostic factors, and patient preferences

Provide ethical guidance, measures to facilitate psychological support, and public education initiatives to mitigate moral distress and psychological burden to families, bystanders, and first responders

Incorporate ethical reasoning and communication of ethical decision-making into resuscitation training

Inform the public about emergency research regulations and involve patients and members of the public in the design, conduct, and dissemination of research
