ETHICAL CONSIDERATIONS BEFORE, DURING AND AFTER RESUSCITATION

GUIDELINES 2025
EUROPEAN RESUSCITATION COUNCIL©

Bystanders

- Encourage bystander CPR without undue pressure
- Ensure transparent legal protection for bystanders

Advance Care Planning

- Based on patient values and preferences
- Early dialogue with patient and family
- Accessibility of advance directives

Family Involvement

- Give families the choice to be present
- Assign a trained team member to support families

Termination of Resuscitation and Organ Donation

- Consider the context, patient preferences and all prognostic factors when terminating CPR
- Ensure organ donation strategies to enhance organ availability
- Use adapted termination of resuscitation procedures when offering donation after circulatory death

Consider resuscitation ethics within the context of resource setting

CPR - cardiopulmonary resuscitation
